

Science Knowledge Organiser - Working scientifically (KS1)

Explore the world around them and come up with their own questions.

Learn to work scientifically which involves:

<p>Asking simple questions ?</p>	<p>eg) What if ? Where? How? Why? Which? How many?</p>
<p>Recognising that questions can be answered in different ways</p>	<p>When working scientifically, we may be asked to record our findings:</p>
<p>Observing closely using their senses</p>	<p>Prediction: This is what we think will happen and is usually based on what we already know.</p>
<p>Using their observations and ideas to suggest answers to questions</p>	<p>Results: We may be asked to write about or draw our results. Remember to use all of your senses except taste unless your teacher says it is safe!</p>
<p>Using simple equipment eg) magnifying glasses, timers, thermometers</p>	
<p>Performing simple tests</p>	
<p>Identifying and classifying</p>	
<p>Gathering and recording data to help answer questions</p>
