

Victorian Britain
 The Victorian period is named after Queen Victoria who reigned over Britain and a world Empire from her coronation in 1837 to her death in 1901 – 64 years. Life in Victorian England was vastly different to today. It was a time of great wealth and poverty, as well as invention and scientific discovery.

Key Knowledge
Queen Victoria was Queen of the United Kingdom of Great Britain and Ireland from 20 th June 1837 until her death. On 1 st May 1876 she adopted the title of Empress of India.
Queen Victoria’s husband, Prince Albert, died of typhoid aged just 42. Victoria withdrew from the public life for many years after his death but on return based her decision on what she thought Albert would have done.
The Victorian era saw a huge contrast between rich and poor. The rich lived a life of ease and comfort whilst the poor lived in constant fear of the workhouses.
In the Industrial Revolution the manufacturing of goods moved from small shops to large factories. This meant that more people moved into cities. It was a time of new technologies and a new, more modern way of life.
Alexander Graham Bell was a Scottish born scientist and inventor who was credited with inventing the first practical telephone. Both his mother and his wife were deaf, which influenced him to explore hearing devices.
Thomas Edison was an American investor and businessman who lived from 1837-1941. He had many inventions, including the long-lasting electrical lightbulb. This replaced oil and gas-powered lighting, which were often dangerous.
Until the late 19th Century education was reserved for the rich. As many families were so poor, many children instead had to work. They worked long hours for little money.
For the rich, expensive clothes were a must. Clothes were almost always made to measure. Women wore elaborate dresses, blouses and bonnet hats. While men wore high-waisted trousers, cravat tops and top hats
